## RoadPower™ Single PTO Systems 5.1kW / 6.3kW / 8kW

RoadPower™ Single PTO Systems include a RoadPower™ Generator, ACU, PTO Mounting Bracket, specialized connectors and cables and remote panel.

### Features

Increased power at a lower RPM

fuel economy

noise reduction

pollution reduction

Designed for markets requiring 10,200-15,100 watts of on-the-move power

patented and proven itself in very demanding industries/ Oil Field, Commercial and Government markets

Built per your truck's specification for driver side or passenger side PTO

Two RPM configurations depending on need

Unique drive-thru shaft allows for multiple PTO devices

Reliability and Longevity

proven design for over ten years

Economical

Remote Panel

switch powers the system on or places it in standby

bar graph indicates operational characteristics

detects system issues and illuminated lights will assist in determining the nature of the issue

PTO dimensions
14" from generator to outside of unit / 15-3/4" L / 10" deep
Shaft 1-1/4 diameter with a keyway

### Installation

trouble free with plug and play connectors

# Mobile Electric Power Solutions, Inc.

## How much power do **YOU** need?

- Unique capability to meet your power requirements
- Our 120V and 240V ACUs will drive and protect each of our generators

**\*Our 120v and 240v ACUs will drive and protect each of our 120v and 240 generators from overload. This gives us a unique capability to specifically match our products to a customer's mobile power requirements.**
